SETTING

POE TESTING VIA SWITCH

Identify the type of PSE, it is af or at standard.
Power supply modes (endspan/misdpan, 4 pairs)

POE POWER TESTING

Test the voltage power between power adaptor and powered device

POWER TESTING

Testing the power, current, voltage between power adaptor and Powered devices

PRODUCT STRUCTURE

LOOPBACK TESTING

Testing the loop circuit connected to switch is normal or not

1.If the Led indicator is lit on,it means the loop circuit is good.

2.If not,then there may exsist some problems in the circuit.

PRACTICAL APPLICATION

Usage scenarios for some functions
